## ABSTRACT

In fall 1975, 4,702 students transferred into the University of Hawaii (UH) System, representing a 15.5 percent increase over the number of transfers in 1974. Of the total, 56 percent transferred from within the UH System, 6 percent transferred from other Hawaii institutions, and 36 percent transferred from out-of-state institutions. The total numbers of transfers from within the System in 1975 represents an 8.7 percent increase over the 1974 figures. The University of Hawaii at Manoa (UHM) received 1,999 transfers; Hilo College received 300; and the seven community colleges received 2,403. Sixty-one percent of the transfer students entering UHM chose arts and sciences programs, and 14 percent entered as unclassified students. Greater proportions of students entering Hawaii, Honolulu, and Kapiolani Community College selected vocational programs, whereas more of those students entering Kauai, Leeward, Maui, and Windward Community Colleges selected liberal arts programs. Data for the 1973, 1974, and 1975 academic years are organized into three tables with are appended. (DC)

## SUMMARY

The number of students transferring to the nine campuses of the University of Hawaii during the past three fall semesters is briefly summarized in this report. Data about transfer students provide some insights on the extent of student movement within the University System and on the extent of in-migration of students from non-public Hawaii and out-of-state institutions. Excluded from this study are students from the UH system who transfer to non-UH institutions.

### Previous College Attended (Table 1)

Transfer students numbered 4,702 in Fall 1975, an increase of 15.5 percent since Fall 1974. Increasing numbers of students are transferring from other campuses within the University system as well as from out-of-state institutions.

Of the 4,702 transfer students in Fall 1975, 56 percent transferred from within the UH System; 6 percent from other Hawaii institutions, 36 percent from out-of-state institutions, and 2 percent had no data on last college attended.

In the analysis by campus, the largest proportion of transfers from within the system were noted for Honolulu Community College (73.6 percent, 381 students) and Kapiolani Community College (67.8 percent, 366 students).

### Programs Entered (Table 2)

Of the total 4,702 transfer students, 2,981, or 63.4 percent entered one of the University of Hawaii at Manoa (UHM) colleges, Hilo College divisions, or community college liberal arts programs; 778, or 16.5 percent entered as unclassified students; and 920, or 19.6 percent entered vocational education programs.

Sixty-one percent of transfer students entering UHM chose Arts and Sciences programs and 14 percent entered as unclassified students. Greater proportions of students entering Hawaii, Honolulu, and Kapiolani Community Colleges selected vocational programs, whereas more of those students entering Kauai, Leeward, Maui, and Windward Community Colleges selected the Liberal Arts program.

### Transfers Within the UH System (Table 3, Figure 1)

The total number of transfer students from within the UH System increased from 2,417 in Fall 1974 to 2,627 in Fall 1975, an increase of 210 students or 8.7 percent.

In the past, more students transferred out of than into Hilo College and the community college campuses. However, in Fall 1975, 381 students transferred into Honolulu Community College, while only 267 transferred out.
